

Twisted Road 20-point Inspection Checklist

Video each checklist item on your bike to show us everything is in good working order, and nothing is damaged. The video should be no more than 5 minutes. One walkthrough showing each item is all that is required. No need to video each item on the checklist separately. Make sure the area is well-lit so that we can see everything clearly. If you have any questions, you can contact us at info@twistedroad.com.

Thank you for being a part of our growing community!
